Package Deal Price

£375.00 Ex VAT

As increasing numbers of poor quality imports are entering the market we have created a high quality, British made range of machines to bend conduit, copper and steel to EN and BS standards. We have kept the basic design traditional maximising ease of use and familiarity to the user – but we have made several subtle but significant improvements.

NEW FEATURES

Adjustable Vice Mount

To allow a range of vices to be used.

Flush Vice Plate

Improving access for threading.

Extra Lever (Optional)

For increased leverage on all bends or use as a counter lever on upbends.

Vice Plate Holes

for final tweaking of the bend without having to set the machine up again or to hold the lever as a makeshift cable reel.

Precision Machined Formers

For increased accuracy.

Wheelkit

For ease of transport.
